

Real Estate NFT Dapp

- The Real Estate Dapp will be built on a blockchain network using the Ethereum platform.
- The project will complete in 15 days.

The platform will consist of the following components:

🧩 Frontend:

- React.js (Frontend Framework)
- Javascript (React & Testing)
- Metamask (cryptocurrency wallet)

🧩 Blockchain Interaction:

- Ethers.js / web3.js (Blockchain Interaction)
- Node.js (back-end JavaScript runtime environment)

🧩 Backend:

- Solidity (Writing Smart Contracts & Tests)
- Hardhat (Development Framework)
- NFT ERC 721 (Ethereum Request for Comments: creating non fungible tokens)
- IPFS_ (Interplanetary File System: distributed file storage)
